Javier Piqueras

SOFTWARE ENGINEER

AVAILABLE FOR FREELANCE / CONTRACT ROLES

ABOUT ME

Hands-on Fullstack Engineer with 10+ years in web development, evolving from Junior Developer to technical leadership while staying deeply immersed in code — my core passion. Expert in building scalable, high-quality applications with a focus on clean architecture, comprehensive testing, zero technical debt, and proactive obsolescence management.
Proven in delivering robust systems at scale, I seek roles as a senior contributor or freelance specialist where I can drive technical excellence through direct coding, architecture, and optimizations.

SKILLS / TECH STACK

Frontend — React (Hooks, Server Components) · TypeScript (Advanced) · JavaScript · Tailwind CSS · Zustand / React Query · Jest · Cypress
Backend — Node.js (Advanced) · NestJS · Express · TypeScript
Databases — Prisma · PostgreSQL · MongoDB · Redis · MySQL · Oracle
DevOps / Cloud — Docker · AWS (EC2, S3, Lambda) · CI/CD (GitHub Actions) · Git
Other — Microservices · GraphQL · Clean/Hexagonal Architecture · TDD/BDD · Performance Optimization

PROFESSIONAL EXPERIENCE

- **Head of Application Development and Management**

  BNP Paribas Personal Finance
  August 2022 - Present

  - Directed technical architecture for mission-critical, multi-tenant web apps in automotive finance, using React/Angular (frontend) + Node.js/NestJS/Express (backend) + PostgreSQL/MongoDB/Redis.
  - Implemented scalable microservices and clean architecture, reducing latency and improving system reliability.
  - Led code reviews and contributed production code in TypeScript/Node.js, enforcing comprehensive testing (Jest/Cypress) with >85% coverage.
  - Managed cloud deployments (AWS) with Docker/CI/CD, achieving zero-downtime updates and compliance with financial regulations.
  - Optimized legacy Java components for high-availability, integrating with modern JS stacks.

- **Technical Leader**

  BNP Paribas Personal Finance
  February 2019 - August 2022
  - Owned fullstack development for multi-country automotive financing platform (e-commerce + dealer portal), using React + TypeScript frontend, Java (Spring) high-availability services + PostgreSQL, and Node.js APIs + MongoDB.
  - Architected and implemented scalable, compliance-driven features, supporting 5 countries and +10k daily transactions.
  - Optimized performance and security, reducing incidents TDD and observability tools.

- **Junior Consultant Engineer**

  Altran Innovación
  September 2018 - February 2019
  - Developed B2B/B2C financial solutions using Angular/React (TypeScript), HTML5/CSS3 frontend, Java (Spring) backend, and Oracle databases.
  - Implemented responsive UIs and APIs, improving user experience for multiple clients.
  - Collaborated on integrations, focusing on code quality and testing.

STUDIES

Masters Degree - Engineering and Data Science
Universidad Nacional Española a Distancia - UNED
2019 - 2021

Masters Degree in Informatics Engineering
Universidad Complutense de Madrid - UCM
2017 - 2019

Informatics and Software Engineering - University Degree
Universidad Politécnica de Valencia - UPV
2013 - 2017
